Service Call
Cost of Less
Than 1.3% of
Machine Price***

Future Technologies Incorporated ("FTI") is a recognized leader in the development and manufacture of *engineered leak testing systems* for production and laboratory applications. In addition to our highly respected leak testing systems, FTI designs and builds state-of-the-art *assembly, automation, welding, and functional test systems* and *calibrated standard leaks*.

FTI's Guiding Principles:

- Providing the ***highest value possible*** via the use of ***off-the-shelf components***
- Focusing on ***simplicity and robustness*** of design; ***minimizing cycle time*** and ***maintenance requirements***
- Maintaining a ***world class service*** reputation long "after the sale"
- Attention to our own ***financial strength and stability*** (D&B credit class "1")
